

Six inches for Longitudinal  
flue space fire code requirement  
for fire sprinkler effectiveness

# Adapt-a-Stop<sup>®</sup>

## Vertical Model

Patents Pending

Upper pallet rack  
horizontal beam

Upper vertical  
load stop  
bracket

Double  
3/8" bolts, nuts  
and washers

Double  
3/8" bolts, nuts  
and washers for  
bolting to  
horizontal beam

First Vertical  
load stop for  
wall or  
back to back  
applications

Second Vertical  
load stop beam  
for back to back  
pallet racks

Lower pallet rack  
horizontal beam

Lower vertical  
load stop bracket

Double  
3/8" bolts, nuts  
and washers

This configuration for back to back pallet racks to protect items and maintain flue space, required between pallets for fire code regulations. Food storage warehouses must have 12" flue space for rodent trap placement and cleaning purposes. Either Adapt-a-Stop<sup>®</sup> horizontal or vertical load stops can be used.
